

HALF DOUBLE PRACTITIONER COURSE DESCRIPTION

LEARN HOW TO ACHIEVE DOUBLE THE IMPACT IN HALF THE TIME IN YOUR PROJECTS

The Half Double methodology is a new and radical approach that aims to lead projects to double the impact in half the time. While building upon what we know works from best practice project management, it differentiates itself in three main areas; Impact, Flow and Leadership.

Impact creation throughout the lifetime of a project is the primary area of focus (rather than the project deliverables). We inject energy and transparency through the flow of a project and break down the formalism embedded in project structures by promoting the leadership of people rather than the management of systems.

SIGN UP

Whether you own, lead or participate in projects, the Half Double Practitioner course will provide you with a framework for accelerating time to impact.

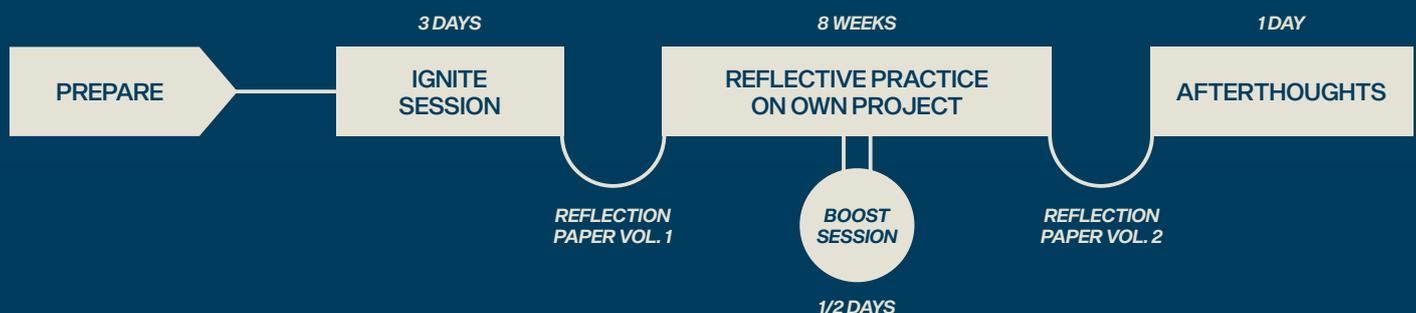

Attending the following three sessions will enable you to use the methodology in practice:

- » Ignite: The 3-day "Ignite" session gives you an introduction to the methodology. At the end of the Ignite session you will apply your newly acquired methods to plan your personal Half Double journey
- » Boost: The half day session gives you the support you need during the application of the methodology to your own project.
- » Masterclass: The 1-day "Masterclass" addresses the key challenges of applying the methodology in practice and how to overcome them.
- » Two reflection papers will help anchor your learning and serve as guidance on where you need to focus your energy first.
- » Additionally, you are invited to join 4 Afterthoughts sessions throughout 2020 where you can continue to share, learn and network with your fellow participants.

MAIN CONTENT

The course covers the following main topics:

- » An overview of the Half Double methodology and how it fits into the context of classic and agile projects.
- » Building an impact case to drive behavioural change and business impact.
- » Using Impact Solution Design to deliver impact as soon as possible.
- » Setting up pulse checks to monitor stakeholder satisfaction.
- » Setting up a fixed heartbeat to progress the project in sprints.
- » Visual planning to gain insights and build commitment in your project.
- » Allocating resources to ensure a core team that can be co-located.
- » Building a reflective and adaptive mindset for your project leadership.
- » Leading a project collaboratively for increased motivation in the project.
- » Inviting project owners to support the project by being more actively involved.
- » Locally translating the tools to ensure that they can be a success for you in the context that you work in.

THE COURSE INCLUDES

Before the course: Preparation reading materials.

During the course: Meals, notebook with stickers and a collection of articles.

After the course: 4 Afterthoughts sessions (optional).
